

AMENDMENTS TO THE SPECIFICATION

Please amend the Specification as follows:

- (a) Delete the sentence beginning on page 7, line 10 and ending on page 7, line 13, with the word "parallel, and substitute therefor the following:

---The phirality of longitudinal fins 24 further include a third fin pair 24''' and a fourth fin pair 24''''. Fin pairs 24''' and 24'''' are opposed about outer surface 22 and disposed in alternate planes tangential to outer surface 22. The tangential planes of fin pairs 24''' and 24'''' are substantially parallel.---

This substituted language clarifies that the third fin pair is designated 24''' and the fourth fin pair is designated 24''''. The error was an obvious clerical error.

- (b) In the Abstract of the Disclosure, delete the sentence, "A pair of the fins may project radially from the outer surface of the handle and are diametrically opposed," and substitute therefor,--- A pair of diametrically opposed fins may project radially from the outer surface of the handle.---

Also in the Abstract, delete the sentence, "Two separate pairs of the fins can project radially from the outer surface of the handle and are diametrically disposed," and substitute therefor,--- Two separate pairs of diametrically disposed fins can project radially from the outer surface of the handle.---

These corrections to the Abstract have been required by the Examiner.

- (c) Delete the words, "for example," at page 1, line 30.

- (d) Delete the caption "SUMMARY," at page 2, line 10, and substitute therefor---  
SUMMARY OF THE INVENTION---.

- (e) Delete the sentence, "A pair of the fins may project radially from the outer surface

of the handle and are diametrically opposed,” at page 2, lines 20-21, and substitute therefor,---  
A pair of diametrically opposed fins may project radially from the outer surface of the handle.---

(f) Delete the sentence, “Two separate pairs of the fins can project radially from the outer surface of the handle and are diametrically opposed,” at page 2, lines 23-24, and substitute therefor,--- Two separate pairs of diametrically disposed fins can project radially from the outer surface of the handle.---

(g) Delete the phrase, “Fins 24 may also be variously configured such as, for example, staggered, undulating,” at page 6, line 32 – page 7, line 1, and substitute therefor,---  
Fins 24 may also have a variety of configurations, such as staggered, undulating,---

(h) Delete the phrase, “the tangential planes may be alternately configured, such as, for example, disposed at a particular angular orientation,” at page 7, lines 13-14, and substitute therefor,--- the tangential planes may be alternately configured; for example, they may be disposed at a particular angular orientation,---

(i) Delete the sentence, “For example, adjacent grooves 26 may define alternate volumes, such as the volume of groove 26 (defined by fin 24” and fin 24’’) have greater than groove 26 (defined by fin 24” and fin 24’’’),” at page 7 lines 29-31, and substitute therefor,---  
For example, adjacent grooves 26 may define alternate volumes.---

This will obviate the error of referring to both grooves having the same volume, as pointed out by the Examiner.

(j) Claim 9 will be hereinafter amended to recite that the grooves define guide channels, which indicates that the grooves and the guide channels are one and the same, and not two separate and distinct parts.
